40 40 years of
research & development

 90 international
awards & recognitions

 Numerous patents
& innovations

 Cooperation with renowned
organisations & scientists

*Everything that surrounds us and that we are made of
is a set of vibrations and pieces of information
transmitted and distributed by them.*

The energies are available to us at all times; it is only a matter
of how open and perceptible we are to them. Today, we are
lucky to have achieved the knowledge and skills that allow
raising the levels of energy and information flow with the help
of information technologies of the new age.

POZNIK VILI, inventor and founder of the ITP.

i9 TECHNOLOGIES AND HISTORY (ITP)

i9waterbottle.com

The **primary** process in the organism is **maintaining a proper balance**. Any deviation affects our health, well-being, our strength and flexibility, and consequently also our beauty, sensitivity, etc.

Therefore, it is not enough to focus only on the current situation we are in. The **essence** of the **ITP** is not only to **heal, repair or improve** the human energy system, as well as create the flow of energy in it, but to offer **support in active involvement in the processes**, as well as reducing the negative consequences of past events and current harmful effects. The ITP enable you through an appropriate set of **information (I)** to activate the **energy (E)** for the **stimulation of natural and autonomous processes** that bring us to our primal balance and **trigger in us the potential (P)** for **self-regulation and self-cleaning**, which is beneficial for our well-being and health.

For its assessment unit, the Poznik Information Technologies (**ITP**) use the **Informational Energy Potential (IEP)**, which is a response to the current and lasting conditions in the direction of the interaction of information and energy.

Poznik Vili,

inventor and founder of the POZNIK PT

Poznik Vili, an outstanding 85-year-old innovator from Celje, has achieved outstanding achievements and **received many international awards** for his numerous innovations, **many of which have been patented**. His primary goal is helping people and **improving our quality of life**, because his inventions that can be accessed by everyone improve our well-being and health.

In the pursuit of his inventions, he has cooperated with hospitals, clinical centres, universities, and scientists from various disciplines at home and abroad. In his work, he tackles the area of physical medicine and information technology that has its foundations in quantum physics. Great expansion is promised for this scientific field in the future, so some call it **the technology of the third millennium**.

ITP through time

History and development of the ITP

1980

Development and production of medical equipment for rehabilitation and physiotherapy.

1985

Research on the impact on the electromagnetic field of humans with the help of information and frequencies, as well as the development of ELMAG and NORAD products for the reduction of harmful effects of mobile phone radiation.

1990

Research and development of the technology by influencing the structure of water and its vitality. The establishment of the Hydronic development team.

2000

During this period of development, the Poznik Information Technologies had received numerous international prizes and awards in the field of positive impact on the environment and human well-being.

2005

The focus of the Information Technologies Poznik on the impact of information, research and development of various possibilities of use of the information gathered from various objects and beings, as well as circumstances.

2015

The development of products with the bee sting's information, the development of devices for acupressure and various informed products.

.....

The focus on the educational programme and the integration of various **professions** in international cooperation in the field of information technology research.

INFORMATION TECHNOLOGIES (ITP)

The energy symbol derives from a
"magic life" protective form

Hydronic technology

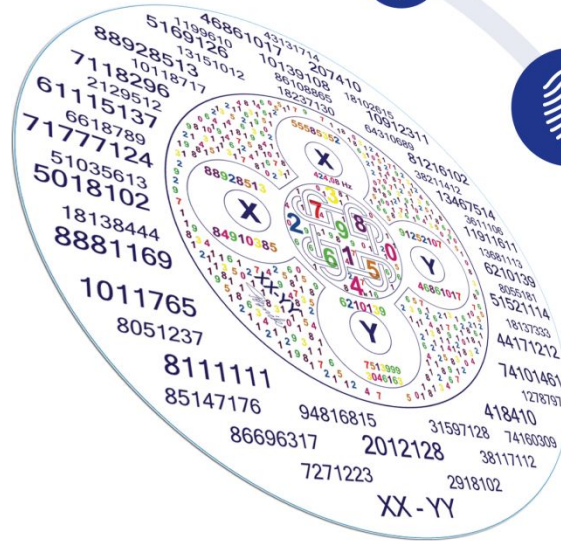

Information imprint
technology

Data capture and
treatment technology

Information transfer
technology

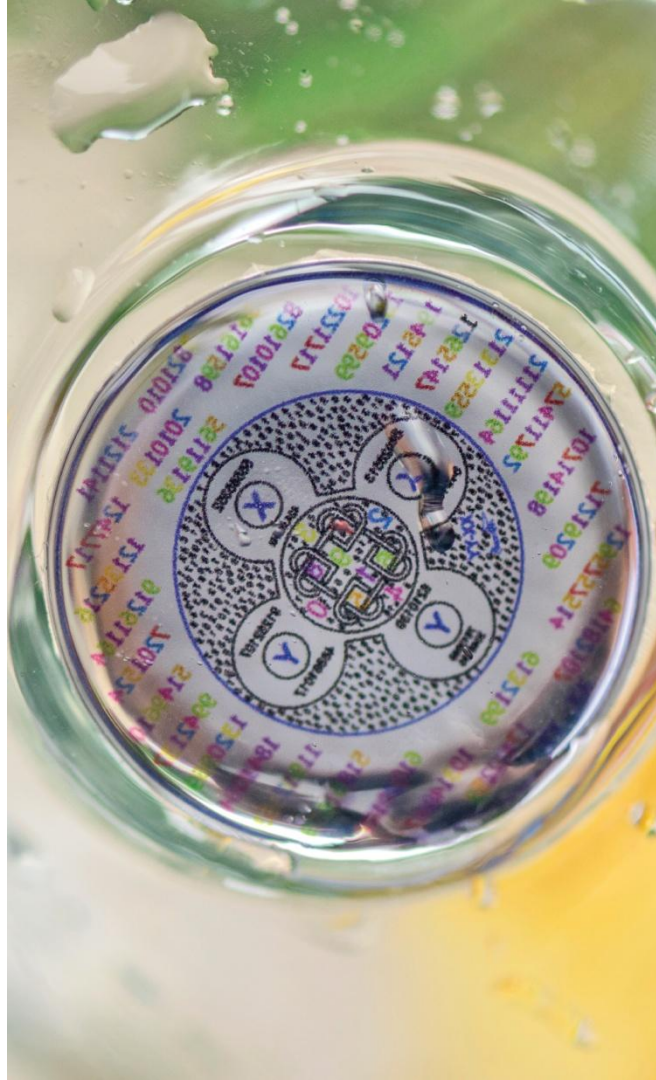

The energy symbol

Magic Life

The energy symbol derives from the "Magic Life" protective form and is enhanced by a precise selection of information in the form of information codes. Moreover, orgone emitters in the Poznik lab inscribe the energy symbol, in addition to the information, with a frequency for stabilisation, activation, and information transfer by way of emitting the information, and can be directed and usefully used.

With an innovative approach, we are able to do the following:

- Opening and stabilising the chakras in a very short time (150% in a few minutes);
- Balancing the chakras (with an increased exchange of information);
- Protection against geopathic interference;
- Increasing the value of biophotons in water;
- Comprehensive impact on processes in a way that stabilisation and balance are ensured in a short time;
- Tuning of processes via paragenetic stabilisation with an increased exchange of information between fine and material / substantial components.

Hydronic Technology

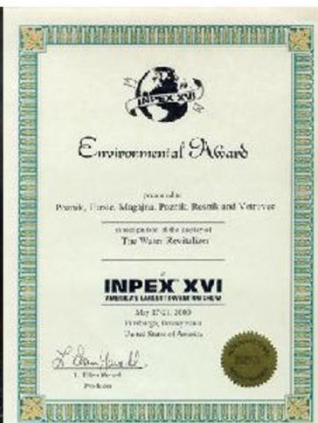

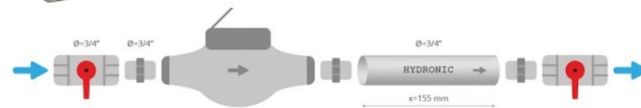

Vitaliser for a healthy and full life

With the HYDRONIC Technology, we influence the **vitality of water**, with the impact of the changes in the structure and electrodynamics of molecular groups which are perfectly sufficient to affect a variety of chemical reactions in water and thus also the biochemistry of plant, animal and human organisms if such water is entered into them or if they come into contact with it.

Living matter is able to perceive the physical effects that are far below the threshold of sensitivity of even the most sensitive instruments.

This can be reliably determined with the **Allium biological test**, which allows us to observe the **effects on chromosomes** as the basic unit of any living creature.

The Hydronic Technology has received a whole series of **international awards** for invention, innovations in the field of **ecology**, etc.

Information Imprint Technology

State estimation of objects, beings, and circumstances

Based on **knowledge and experience** from the field of the ITP, it is possible to produce the **estimations** of the state of various objects and beings, as well as **circumstances**.

With this approach, we get an **answer**, which we call the information imprint.

The information imprint provides us with the information on the universal and specific conditions, which allows us to create protocols and approaches for changing the identified state.

The information imprint can be made for people, animals, plants, space, materials, circumstances, and the environment.

We and everything that surrounds us exert an influence on everything and everyone. When these influences are in **harmony** and in line with **expectations**, we **experience** no disturbance.

Thus, the acquired information allows us to create an imprint, which shows states that can be **harmonised** with the help of **natural laws** that existed long before man had the wish to conquer nature and himself.

When we successfully detect and define the informational **energy** imprint, we have the option to treat the activities of change.

The ITP allows us to process data in a manner that on the basis of the obtained results, we process procedures for the elaboration of the protocol, which enables the necessary and desired **changes**.

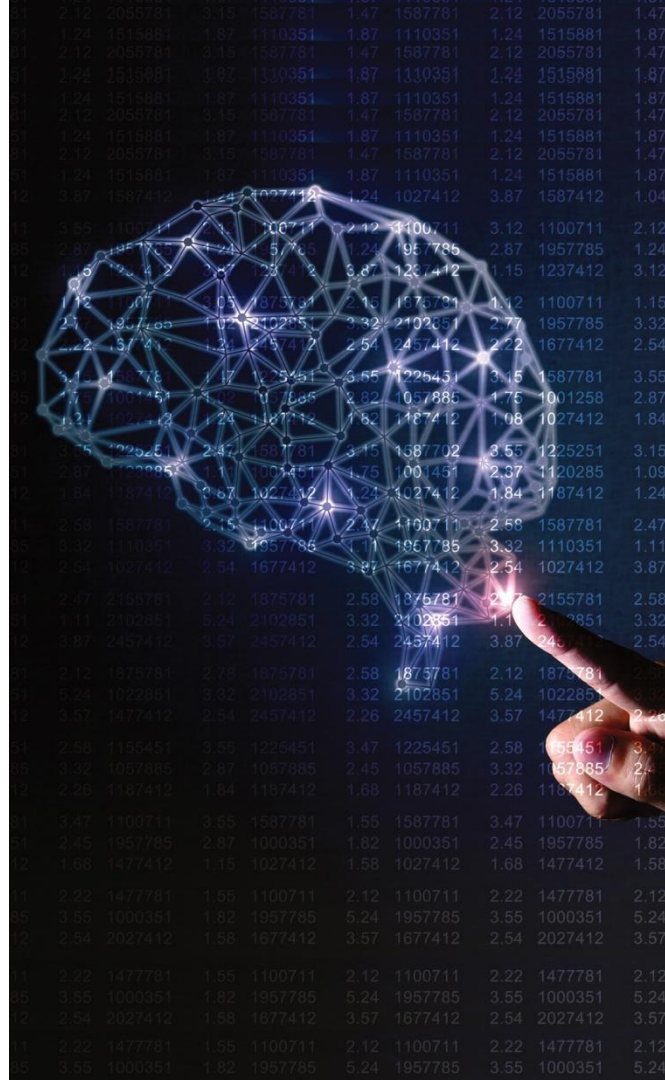

Data capture and treatment technology

Code inscription of element properties and vibrations

The production of a **code** inscription of **element properties** in the form of characters, colours, symbols, and numerical codes.

It consists of various procedures where numerical inscriptions, calculations of energy forms, the impact properties of colours, sound inscriptions, and the breakdown of sociological, philosophical, and historical elements are used. When the universal data are processed, specific data and wishes are added. After the calculations and measurements are completed, the final inscription in the form of characters, colours, symbols, and **numerical codes** is **formed**.

By the methods of the Poznik Information Technology, we are able to **detect** those fundamental **deviations** and conditions that enable the approaches of **balancing** and **influencing** the **causes**, and not just the **consequences**.

Primarily, **we are using the radiesthetic methods and kinesiological tests.** With that, we obtain the first assessment of a variety of conditions and impacts. This is followed by a great variety of procedures that help us make sure that we have **properly captured** and defined the problem or a specific condition.

When modulation is achieved with the help of measurements and experiential empiricism, we are able to produce the code inscription for the processing of changes.

This inscription allows us to **imprint or emit** it in many different carriers, differing in colours, shapes, sizes, and materials.

These various holders – carriers of information then work on their own and in contact with certain elements.

Information transfer technology

The transfer of information with orgone radiators

For the transfer of captured and treated information, we use orgone emitters.

On the basis of the findings of Wilhelm Reich, the orgone **ether** is the universal ocean of cosmic energy, which fills and runs the entire Universe, the energy fields of organisms, it affects all processes and meteorological conditions in the Earth's atmosphere and cosmic movements.

In the transfer of information, we use orgone **emitters** of our own **design**, which are **protected by copyright**. On the one hand, we have elements which are the carriers of coded information and messages. These elements are associated with orgone **emitters** and other information flow converters / transducers and are oriented on a variety of objects and material in which the relevant information gets imprinted.

With the information transfer technology, we achieve that the information is imprinted in the selected objects which they are emitting in the surroundings when used for the specific purpose – or they are functioning in accordance with the current function and accumulated information.

In this procedure, a few thousand to hundreds of thousands of pieces of information are transferred.

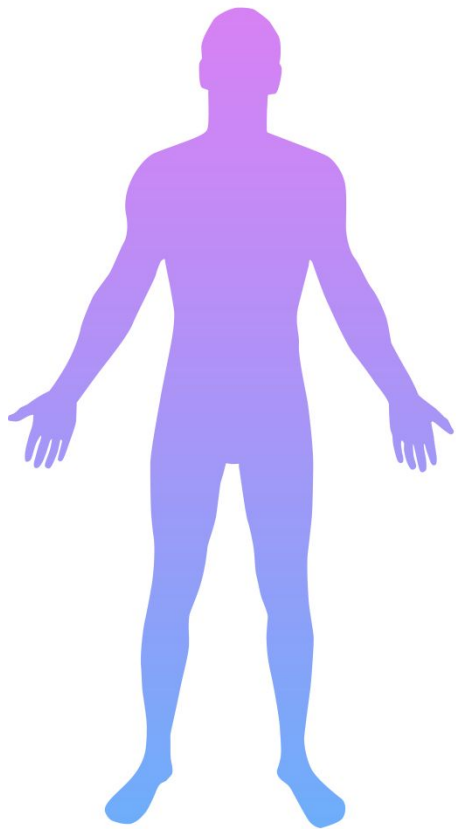

The information consists of a set of universal information and a specific range of strictly dedicated information. By this, the functioning on a universal and concrete levels is achieved.

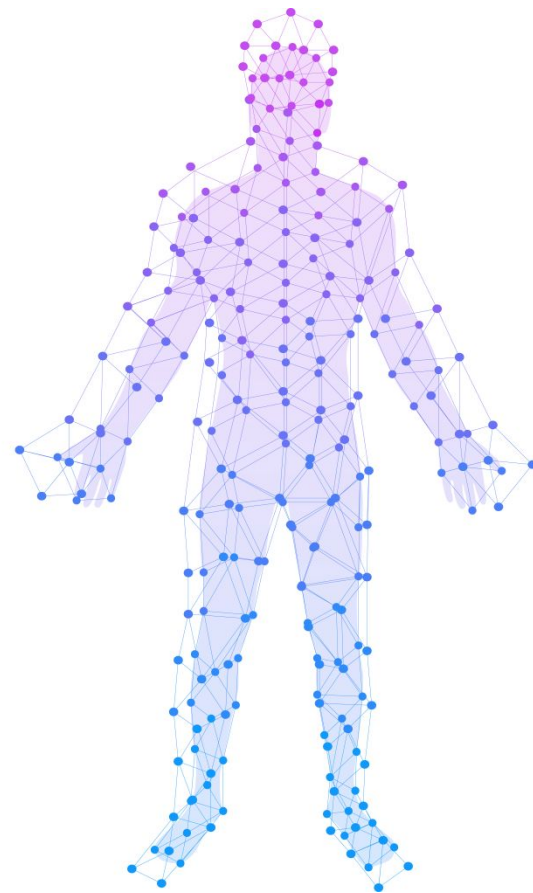

INFORMATIONAL ENERGY POTENTIAL (IEP)

i9waterbottle.com

Physical body

Informational - energetic
body

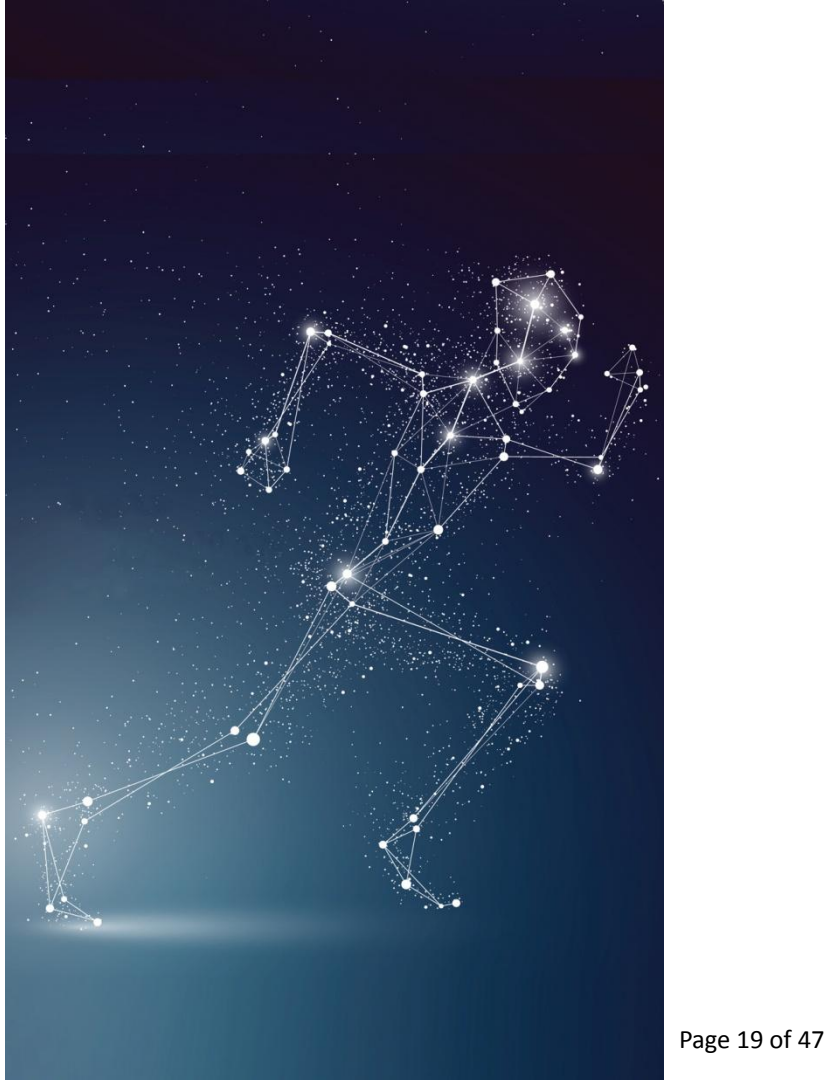

Informational Energy Potential

IEP

The physical body is our complete system by which we experience and participate in life. Through it, our information and energy world is reflected. What structures us are not only biochemical processes of the magnetic and electric spirals dance. The conditions are indefinable and variable at all times, which allows us to join this dance and play a part in the courses of action to achieve the desired changes.

The basic process in the organism is **maintaining** a proper **balance**. Any deviation **affects** our **health**, well-being, our strength and flexibility, and consequently also our beauty, sensitivity, etc.

For its assessment unit, the Poznik Information Technologies use the **Informational Energy Potential** (IEP), which is a **response** to the current and lasting **conditions** in the direction of the interaction of information and energy.

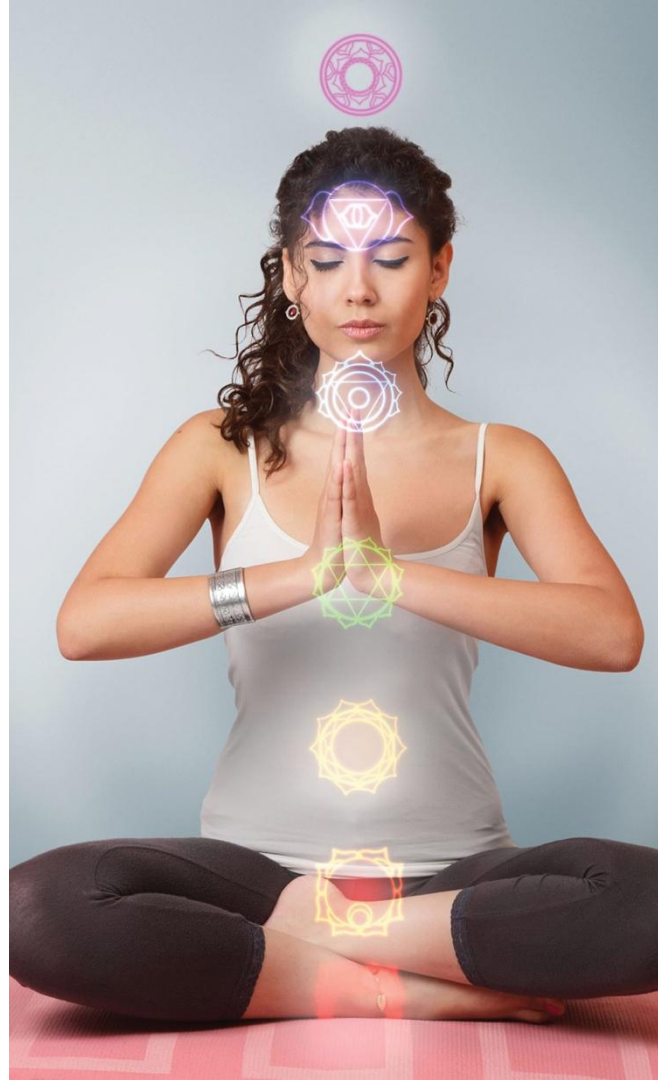

When we **perform** the IEP measurements, we are faced with an assessment of the current processes and the amount of potential that the process allows or limits. The **desired** state of processes is in the area when they do not have the excess of the IEP nor the lack of the **IEP**.

Whenever we talk about the excess of the IEP, we need to deal with the question of whether the excess **potential** is reasonably arranged in relation to the needs and objectives, or whether it may be a response to the processes that need a greater **activation** and breakthrough force to overcome an inadequate state.

Thus, the excess in itself does not talk about the desired state, but about the **reaction** of support systems that can be transitionally potentiated with various incentives of tangible or intangible source.

When it comes to the state of the increased IEP over a longer period of time, we have to deal with the exploration of the causal links that require immediate response to the processes and circumstances.

If the surplus values last a longer period of time, we talk about the exceeding of **self-regulation** that can lead to temporary or permanent burnout.

On the other hand, we are faced with the reduced IEP that may be a response to a deficit as a result of past or current situations. The reduced IEP may **indicate** an inability of **activating** vital functions in the processes, and encouragement at various levels is required. Or it can indicate a degree of self-regulation that **protects** the structures in the process against disproportionate **burdens**.

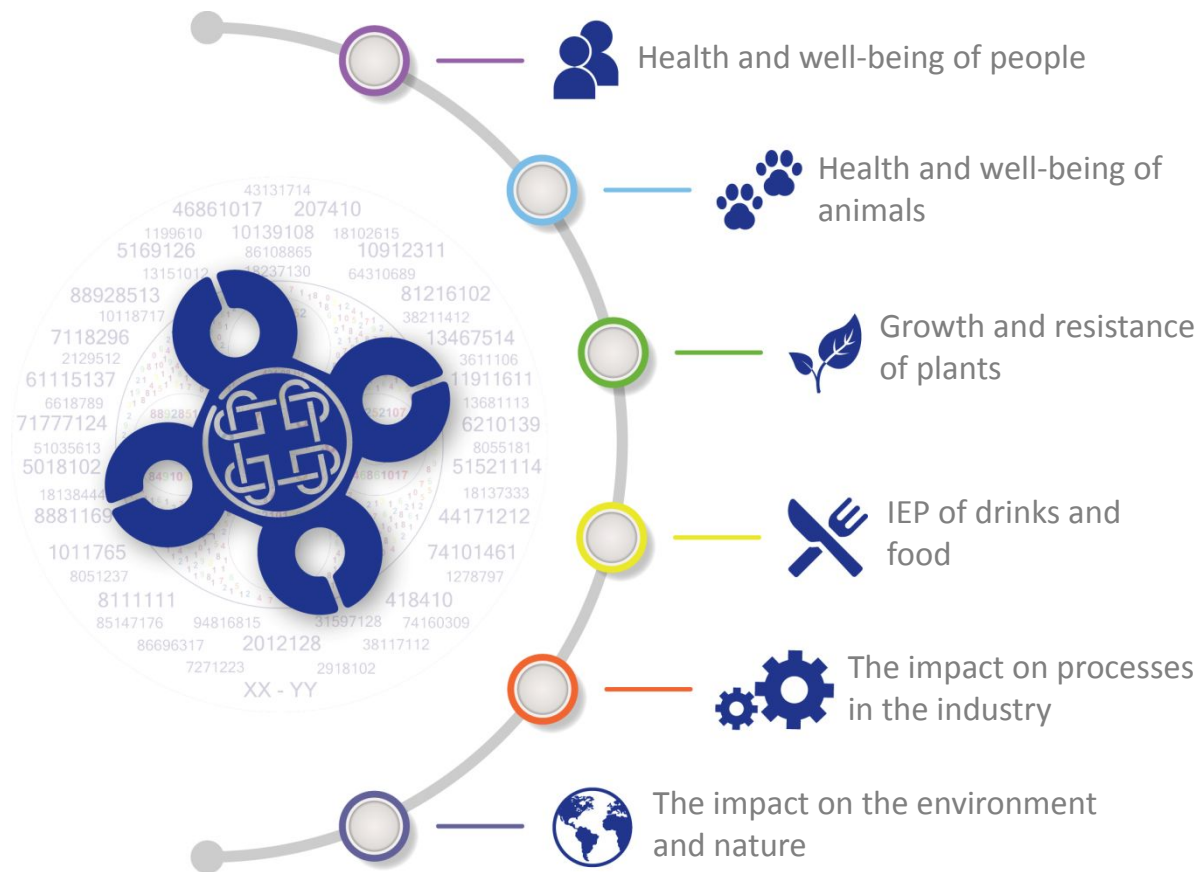

In no way can we consider any of the IEP states in the same way, and enough time needs to be given for in-depth **research**. In particular, in the direction of searching for causes of identified states.

According to this theory, we find that the desired state is a state when the processes are **balanced** and do not have extreme deviations.

ITP IN PRACTICE TESTS AND RESEARCH

THE IMPACT ON HEALTH AND WELL-BEING OF PEOPLE

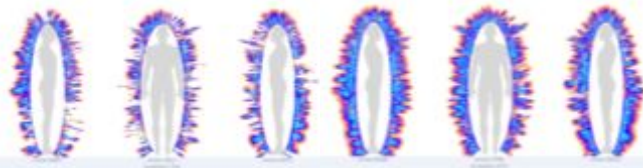

Scientists from the German **Institute of Electrophotonics (Institut für Electrophotonik, Berlin)** have performed extensive tests that have shown the following results:

- A significant increase in the human bioenergetic field;
- A reduction in the level of stress;
- The increase of biophotons (energy) in the water.

The Poznik Information Technologies have received the certificate of the Institute for Electrophotonics on the basis of extensive tests performed on the impact of informed water on humans.

ITP IMPACT ON THE BIOFIELD AFTER 30 min

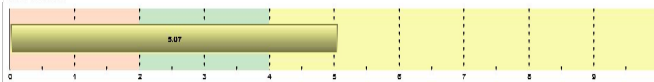

Before

After drinking the
informed water

ITP IMPACT ON STRESS AFTER 30 min

Activation coefficient
Value: 5.07 High

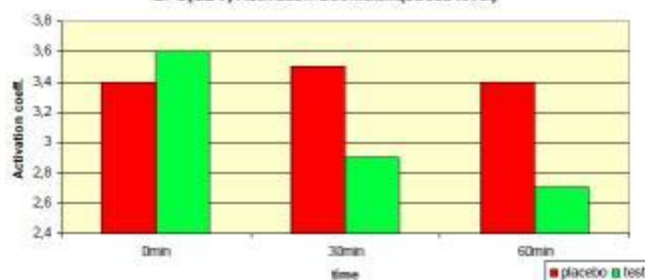

BEFORE

Activation coefficient
Value: 2.65 Normal

AFTER DRINKING THE INFORMED WATER

Comparison of average influences in the placebo and test groups. EPC(GDV) Activation Coefficient(stress level)

The **ALLIUM metaphase genotoxic test** – Peter Firbas, B.A. in biology, from the private Laboratory for Plant Cytogenetics with the Allium method

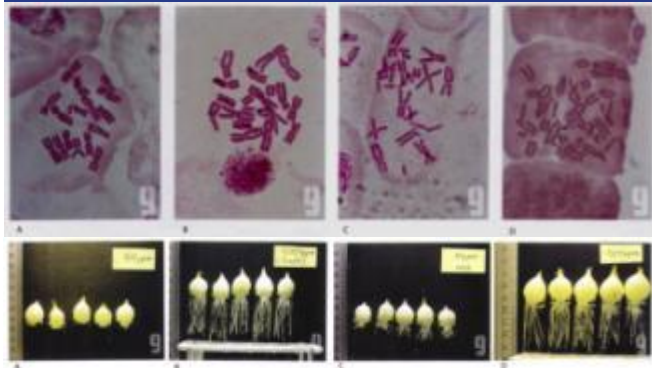

The determination of general cellular toxicity (cytotoxicity) and the levels of genotoxicity in aquatic, terrestrial, and air ecosystems. The laboratory Allium tests have shown the following:

- Chromosome damages have been significantly reduced;
- The level of toxicity has decreased;
- The level of genotoxicity has decreased.

Drops of blood in a dark-field – with blood tests, changes in the structure of the blood can be detected earlier than they can be detected with the regular laboratory blood test.

On the basis of research, it was found that after drinking the informed water, blood cells are healthy, nicely arranged, and allow good mobility that enables good blood flow and supply of even the smallest capillaries with the necessary energy. Prior to drinking the informed water, the flow and supply of the entire organism with oxygen have been disrupted.

ITP IMPACT ON CHROMOSOMES

ITP IMPACT ON BLOOD CELLS

Before drinking the
informed water

After drinking the
informed water

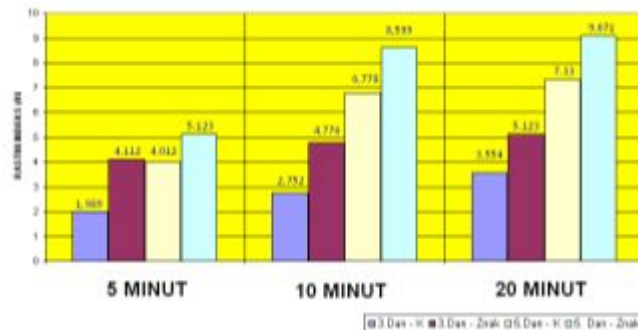

Research in the field of microbiology, virology, and biotechnology (in vitro) – Dr Bratko Filipič – Doctor of Biological Sciences, at the Institute of Microbiology and Immunology, Faculty of Medicine, University of Ljubljana.

The use of the Poznik Information Technologies shows the increased levels of growth prevention of CaCo-2 cells and HeLa cells.

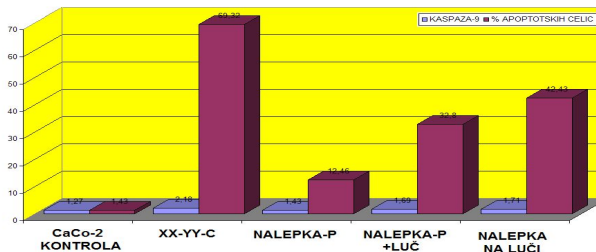

Moreover, there are impacts on the tumorigenic potential in vitro, because at very low concentrations of Ca, the increase in cell growth occurs.

Research has shown that the use of the Poznik Information Technologies also increases the % of CaCo-2 and HeLa cell apoptosis, as well as the value of NO.

ITP IMPACT OF HORIZONTALLY GLUED CHARACTERS ON THE GROWTH OF HUMAN MACROPHAGES (TLT-LINE)

THE IMPACT OF THE POZNIK INFORMATION TECHNOLOGIES ON THE CASPASE-9 LEVEL AND THE % OF APOPTOTIC CELLS IN THE CaCo-2 CELLS

THE IMPACT ON HEALTH AND WELL-BEING OF ANIMALS

The use of the Hydronic when caring for horses.

Mojca Bizjan Seljak; the barn on Drenov Grič.

Proper hydration is essential for the health of horses. Adult horses need between 25 – 45 litres of water daily.

The effects of the use of the informed water (the Poznik Information Technologies) after one year:

- The horses are more vital and more easily tolerate the labour and strain;
- The colic – metabolic disorder has never appeared again;
- The consumption of grain feed has decreased. Due to better hydration, the metabolism of fodder has improved, and the energy effect of fodder is much greater.

THE IMPACT ON HEALTH AND WELL-BEING OF ANIMALS

The use of the Hydronic on the pig farm.

Franc Zmazek; the pig farm in Mala Nedelja.

The measurements were performed at the Ljubljana Institute of Sanitary Engineering.

The measurement method: the Olfactory Measurement Method

The effects of the use of the informed water (the Poznik Information Technologies):

- After the use of the Hydronic, the manure stench is more than 50% less severe in comparison with the measurements without the use of the Hydronic device;
- The pigs eat less fodder and have increased addition through growth due to the improved metabolic rate.

THE IMPACT ON HEALTH AND WELL-BEING OF ANIMALS

The use of the Hydronic in dairy cows.

Kmetija Kuhar; Goričko.

Proper hydration in cattle is crucial for their health, but mainly for their production of milk. Adult cattle needs between 50 – 70 litres of water daily.

The effects of the use of the informed water (the Poznik Information Technologies):

- The number of somatic cells is reduced, and as a consequence, this prevents the development of mastitis;
- Other diseases (bovine viral diarrhea, respiratory diseases, etc.) are no longer present;
- Higher quality of milk is noted.

THE IMPACT ON HEALTH AND WELL-BEING OF ANIMALS

The use of Hydronic in ostriches.

The Misti company in Podvin.

The effects of the use of the informed water (the Poznik Information Technologies):

- The ostriches are more vital and tolerate the weather changes more easily;
- Due to better hydration, the metabolism of fodder has improved, and the energy effect of fodder is much greater; the young ostriches gain weight much faster;
- Diarrhea and other metabolic disorders are no longer present.

THE IMPACT ON GROWTH AND RESISTANCE OF PLANTS

The use of the Poznik Information Technologies in orchards.

Darko Purgaj; the orchard in Slovenske gorice.
The use of the informed eloptic energy.

The effects of the use of the informed energy:

- Greater resistance of flower clusters to weather changes;
- No need for conventional and biodynamic plant protection preparations; chemical preparations for the cultivation and growth are no longer necessary;
- A greater quality and resilience of fruits.

THE IMPACT ON GROWTH AND RESISTANCE OF PLANTS

The use of the Hydronic in the cultivation of strawberries.

Maks Vrečko; strawberry plantation in Zgoše in Gorenjska.
The use of the Hydronic on the strawberry plantation.

The effects of the use of the Hydronic (the Poznik Information Technologies):

- Greater resistance of plants, there are no problems with diseases such as verticillium wilt;
- Higher yields, bigger fruits and a better flavour of the fruits;
- There is no need to use plant protection preparations for the cultivation and growth due to a greater resistance of plants.

THE IMPACT OF THE ITP ON FOOD

The use of the informed technology in baking.

Stanko Serdinšek; the Milena bakery in Lovrenc.

The use of the informed water (the Hydronic) in baking bread.

The effects of the use of the informed water (the Poznik Information Technologies):

- The informed water inhibits the growth of bacteria, which affects the reduced growth of yeast, which is crucial for baking high-quality bread;
- The bread is less crumbly and gets old more slowly;
- The elasticity improves and the taste of bread is much better;
- The people with stomach problems have no digestion problems;
- There are no problems with limescale.

The bakery has been repeatedly awarded the Medal for Quality by the Chamber of Commerce and Industry of Slovenia.

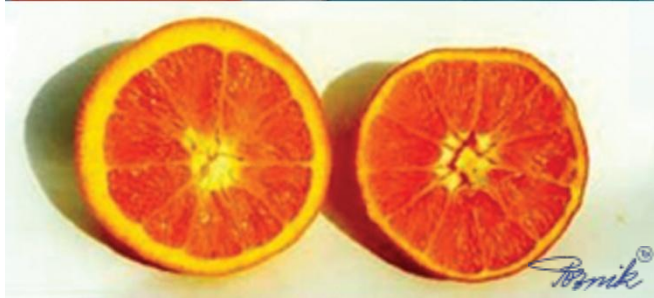

THE IMPACT OF THE ITP ON FOOD

The use of the informed technology in food.

The use of the following informed products: the food coaster, glasses, bottle, and 3D tags in connection with food.

The effects of the use:

- The Poznik Information Technologies inhibit the growth of bacteria; therefore, the fruit and vegetables decompose more slowly;
- The information and energy value of food improves;
- Less fatigue after meals;
- Inhibits the growth of mould in the refrigerators and freezers;
- Metabolism of food improves;
- Food durability increases; food retains its freshness longer.

THE IMPACT ON THE INDUSTRY PROCESSES

The use of the informed technology by the dairy producer.

Mlekarna Celeia; Celje.

The use of informed tags on a yoghurt.

The testing was performed by Dr Peter Bukovec.

The effects of the use of the informed tags (the ITP):

- The IEP of the yogurt has improved and increased;
- The durability of the yogurt has increased and it did not go sour longer than in the case without the use of the ITP.

THE IMPACT ON THE INDUSTRY PROCESSES

The use of the informed technology in the manufacture.

ISKRA SemiČ capacitors; SemiČ.

The use of informed codes on capacitors.

In the manufacture, an inappropriate life expectancy curve has appeared due to the change in the source of raw materials. The laboratory tests did not show any deviations in the material.

The effects of the use of the informed codes on capacitors:

- The life expectancy curve of capacitors has significantly improved.

The Management has also ordered an assessment of the potential impact on the overall processes in the company, and so we have on the basis of the estimates installed a transmission antenna above the factory with the aim to stabilise the overall processes in the company.

THE IMPACT ON THE INDUSTRY PROCESSES

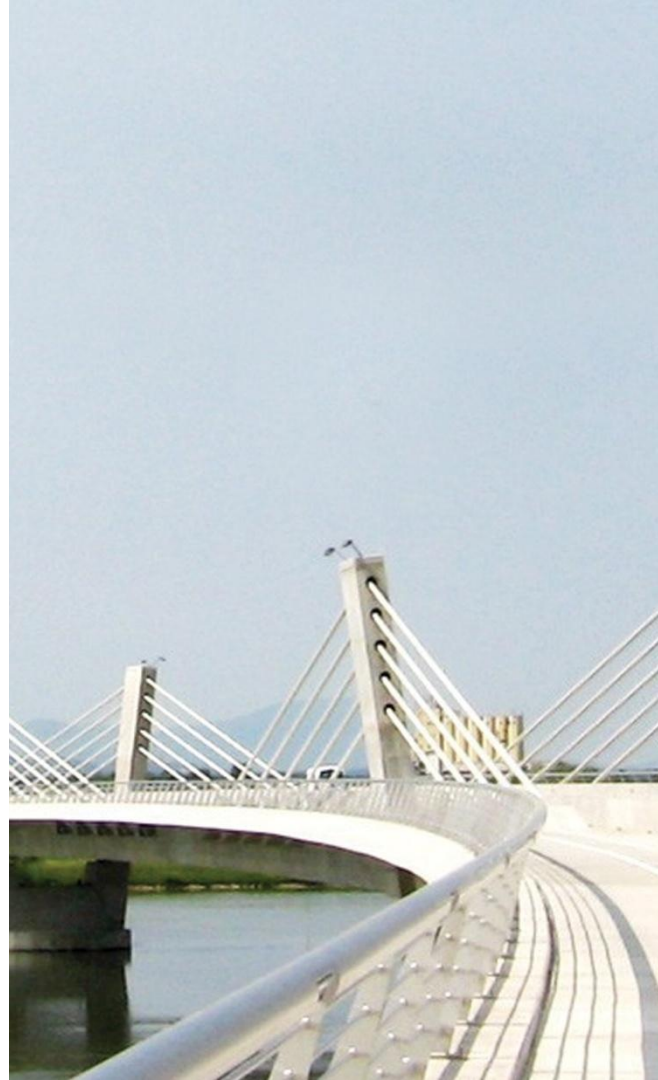

The use of the informed technology in building and civil engineering.

Building and Civil Engineering Institute ZRMK; Ljubljana.
The use of informed water in concrete.

At the Building and Civil Engineering Institute ZRMK, the testing of the impact of informed water in the preparation of concrete has been performed.

The impact of the use of informed water in the preparation of concrete:

- The strength and hardness of concrete have significantly improved;
- The quality of concrete, with the same quantity of material used, was significantly better.

THE IMPACT OF THE ITP ON THE ENVIRONMENT

BIO Park NIVO; Žalec.

The waste water from the NIVO company's cement plant have leaked into the lake which was dead and without any life.

With the help of the Bioboben device, the waste water was cleaned and became suitable for the existence of life again.

The informing of water and the surroundings with the help of the Bioboben and the Hydronic technology:

- The hatching of ducks in winter when there are no chances for survival; there have been no such examples in the wild until now;
- Water that is returned to nature is without organic loads.
- ...

THE IMPACT OF THE POZNIK INFORMATION TECHNOLOGIES ON THE ENVIRONMENT

Sequoia trees; Park Rimske toplice.

For some reason, sequoia trees started drying out. Before the use of the Poznik Information Technologies, they were examined by foresters and various experts whose joint assessment was that the sequoia trees will have to be cut down.

Poznik Vili has performed the analysis and provided an assessment on the basis of the Poznik Information Technologies.

After the treatment of the data, a plan and protocol of the remediation of the current situation was prepared. With special procedures, the information was transferred to the macro and micro locations, and directly to the sick trees.

The situation before the beginning of treatment of trees and the final result are shown on the following slide. Today, the trees are healthy and once again the pride of the Central Park.

INFORMED PRODUCTS

i9waterbottle.com

Available in all chakra colors

i9 bottles take full advantage of chromotherapy by allowing every individual to pick her or his favorite color in chakra combination and balance your personal energy levels.

Good for you, Good for the planet

i9 bottles are made with quality glass. We chose glass because it is better for health and also for our planet.

When it comes to offering a highly durable and reusable coloured bands doesn't contain the estrogen-mimicking chemicals commonly found in plastics, we believe that silicone is currently the best answer.

Strategically positioned coloured silicone bands on i9bottle offer re-enforced grip and better protection against breakage and potential for colour therapy.

How it works

i9 informed water bottle positively affects the water in terms of its vibrational orientation and a high energy potential in the water.

The changes are sufficient to influence on chemical reactions in the water and can alter the biochemistry of plants, animals and the human organism.

Hydronic for the house and Hydronic for the garden

Some of the positive effects of the use of the Hydronic on water:

- It tastes better, it is more soft, more drinkable, and the smell has improved;
- The skin is more toned because it is better hydrated; namely, softer water can penetrate the skin cells more easily;
- There is less formation of limescale deposits in the installations and machines;
- The microbiological status of water has improved;
- It speeds up the growth of plants, the plants are more resilient and the use of plant protection preparations can be reduced or even abandoned;
- It has a beneficial effect on domestic animals, as well as on breeding farm animals: morbidity is reduced, as well as the consumption of drugs and the number of veterinary interventions;
- ...

And what is even more important is that **the Hydronic also removes unwanted information from water and revives it** with positive information, without interfering with chemistry.

ENERGY PLACEMAT

Vitalize your
food naturally

i9waterbottle.com

Available in two colors

Energy Placemat is available in Blue - Gray Color and Violet Color and allowing every individual to pick her or his favorite color and help **increase your energy levels**.

How it works

By placing food or beverages on the Energy Placemat, we achieve balance. Energy Placemat Harmonizes food and beverages information-energy potential.

Food on its way to us is exposed to the impacts that change its energy. It is no longer sufficiently energetically nourishing for the body. With a variety of approaches to informing the food, we achieve that the negative impacts the food or drinks have been exposed to, are "erased" from their memory and change their energy value.

Products for informing the food

On its way to us, the food is exposed to the impacts that change its energy. It is no longer sufficiently energetically nourishing for the body. With a variety of approaches to informing the food, we achieve that the negative impacts the food or drinks have been exposed to are "erased" from their memory and change their energy value.

Products:

- 3D tags for the microwave
- 3D tags for the refrigerator
- 3D tags for vending machines
- Energy table mat

Reducing the effects of mobile phone radiation

The 3D Mobile plate significantly reduces the risk caused by the radiation of mobile and portable phones.

With specific information, it helps to repair the water in our body that is affected by the radiation, and restores the proper functioning of cells.

The plate stimulates the water in our body (on average 75 percent of our weight) to return to the "healthy" structure – to the form, which the water in our body had before the mobile phone radiation had reached it, regardless of the mobile phone strength.

Reducing Indoor exposure to Electrosmog

3D Energy Tag - Harmony of space act as a carrier of information and codes which transform chemical and physical attributes of water and air in the surroundings and thus affect the wellbeing of people, animals and plants. Our moods are improved, we are less tired and the negative effects of electrical pollution by various gadgets are reduced. 3D Energy Tags should be put on the windows of living rooms, offices, workplaces and wherever we want to influence the active processes.

For mood improvement, mental calmness, muscle relaxation, overall wellbeing and peacefulness. Also reducing negative effects of electromagnetic pollution caused by various electronics and gadgets. Can be used for home and office.

Apit patches to reduce pain

The healing effects of the honey bee venom work analgesic and anti-inflammatory: for the treatment of chronic pain, inflammations, joint disorders (rheumatoid arthritis), injuries, lowering blood pressure, reducing the amount of cholesterol in the blood, increasing the overall tension of the muscle tissue, increasing the work ability of the organism, for desensitisation of patients sensitive to a bee sting, for the treatment of bacterial diarrheas.

All you need is
